Abstract: The third book in the series of five for production and personnel policies applied by a company producing electrical wiring, deals with determination of workstations and staffing involved in the production of electrical wiring. These determinations will be based on calculations made in the first two previous works. All policies applied by the company aimed at countering offers of its competitors to meet a demand from clients, while maintaining confidentiality regarding the name and location of the company and the customer concerned.

Keywords: production process, electrical wiring, cutting, assembly, operation time, posts, personnel
