**Abstract:** Students' academic performance plays a vital role in terms of higher education quality. This paper aims to analyse the factors influencing the academic performance of students. The research is based on the questionnaire method, where 728 respondents from five Romanian universities were questioned, "Lucian Blaga" University from Sibiu, Babes Bolyai University from Cluj, Politehnica University Timisoara, Politehnica University from Bucharest and Bucharest Academy of Economic Studies. The collected data are analysed through the factorial analysis and through the univariate analysis, using the statistical programme SPSS. Various correlations and interdependence relations were highlighted, that can be used in increasing students' academic performance and also the quality of higher education.

**Keywords:** academic performance, influencing factors, factorial analysis, correlation.
