**Abstract:** Road traffic safety is considered and must be approached as an issue pertaining to the road transport system, traffic accidents involving direct costs incurred by the healthcare system, the business sector and the families of the parties involved. In spite of certain positive trends, road traffic safety is still a major challenge in Romania, our country being one of the four EU countries having the highest traffic accident rates with victims together with Latvia, Bulgaria and Lithuania.

**Keywords:** Road traffic safety, traffic accident, motor vehicle, public road, driver
