

STUDIU PRIVIND POLUAREA CU PETROL ÎN NIGERIA

STUDY ABOUT OIL POLLUTION IN NIGERIA

Șef lucr.dr.ing. Carmen Gabriela BĂCILĂ
Universitatea Tehnică din Cluj-Napoca

Abstract: From a historic perspective, environmental pollution began with humans, but it has developed and became more diversified as human society evolves, and today it is one of the major concerns of specialists in different fields of science and technology, states and governments, and the entire population of the earth. Anthropogenic activities have also caused topographical and climatic changes that have had strong repercussions on the environment, some positive (eg. afforestation, damping), others negative (eg. deforestation, inring, soil erosion).

Keywords: pollution; environment; anthropogenic activities; unrefined oil
