**Abstract:** Planning is the most important and most sensitive function of management. Production planning has a major impact on the production and business activities of company. The purpose of this paper is to show the particularities of production planning within the S.C. Aerostar S.A. Bacau. At present, Aerostar is number one in aviation manufacturing and number one in civil aircraft maintenance in Romania. S.C. Aerostar S.A. Bacau has implemented a sophisticated production planning and programming system. Thus, within S.C. Aerostar S.A. Bacau, the production planning and programming is performed through a specialized ERP system.

**Keywords:** production, planning, ERP, MRP II.
