Abstract: The continuous progress of society is helped by technology. It grows constantly and quickly, so the IT field becomes one of the most important. More and more young people are turning to careers in the IT field, making it easy to enter the workforce field from the faculty banks. This article aims to highlight the need for increased numbers of IT staff and their evolution. The features of human resources, as well as the types of jobs that this industry offers, are also drawn. At the same time, the article wants to illustrate the attributions of an IT manager and the means by which he can motivate his team.

Keywords: IT manager, IT companies, human resources in IT
