

SISTEMUL NAȚIONAL DE INOVARE ÎN KAZAKHSTAN: ANALIZĂ ȘI PERSPECTIVE

NATIONAL INNOVATION SYSTEM IN KAZAKHSTAN: ANALYSIS AND PROSPECTS

PhD student Diana SITENKO

Buketov Karaganda State University, Kazakhstan

Abstract: This article identifies the main problems of the development of National innovation system of the Republic of Kazakhstan. According to WEF report, Kazakhstan, during last years, remains in a transitional stage from the factor of driven economic development to the efficiency driven one. The author considered the features of National innovation system of Kazakhstan and proposed some recommendations on the formation and development of innovation economy in Kazakhstan. The opportunities for Kazakhstan's NIS include the increasing efficiency of NIS by improving the collaboration between industry and science, a significant increase in productivity through technology transfer, the growth of markets for high-tech products through the integration process (the Customs Union within CIS countries).

Keywords: innovation, National Innovation System (NIS)
